

The Proposal

A new Aldi food store

The site would deliver a new Aldi food store with a larger net sales area in comparison with our existing Leamington Spa store, alongside increased car and cycle parking provision. The proposed store would stock the same range of high-quality, award-winning products found at other Aldi stores. The proposed floor space would mainly be for food goods, with a smaller range of non-food products, alongside servicing and staff areas.

Our proposal for Leamington Spa offers:

- A new Aldi food store with an increased sales area
- Free customer parking with 168 spaces including seven accessible, six parent-and-child and six electric vehicle charging bays
- A new store in a convenient location which would be able to meet increased local demand
- Creation of new jobs in addition to those retained from our closing down store
- Additional employment opportunities provided during construction and the supply chain
- Attractive landscaping around the site to enhance its appearance
